

HerStyler Flat Irons

“Colorful Seasons” is the ideal fashion product based on our classic ceramic straightener.

“Colorful Seasons” features:

A range of 5 color finishes to suit your personal style. Adjustable heat up to 200c, 410f
100% white ceramic plates, 1.5” wide

Solid Ceramic plates that guarantee fast and smooth straightening results without pulling or breaking hair.

Hair will be three times smoother and silkier than with ordinary ceramic straightening irons.

HerStyler ceramic plates generate six times more energy than with an ordinary ceramic straightening iron (like those found in a drug store).

High concentration of negative ions cuts straightening time in half.

Negative ions renew your hair’s natural softness and shine while eliminating frizziness.

Ultra-fast! Achieve the desired temperate in less than 25 seconds (half the time of conventional models). This in turn saves electricity and prolongs the lifespan of the product. Please note that irons should always be switched off while not in use using the on/off switch on the temperature control thermostat.

Hotter and more consistent heat on all adjustable temperature settings.

Adjustable temperature controls suitable for every hair type (240c/410f, 120c/200f). For fine, fragile, bleached or damaged hair we recommend the lowest temperature setting. For coarse, ethnic and resistant hair in healthy condition, we recommend the maximum temperature setting. Ergonomic design making it more comfortable to operate and style!

One Year Limited warranty through HerStyler

Designed in Italy, engineered with American Technology Includes free travel case worth \$15 in matching color!
