

## PURSE HANGERS!

It's always a problem...Where to put your purse when you're eating out at a restaurant. Hang your purse on the back of your chair (easy for someone to slip off). On the floor - under your feet (not very convenient or [sanitary - Snopes.com Article](#)). In your lap? That would get old quick.

The most convenient way? Simply hang your **Purse Hanger** on the edge of the table and hang your purse on the hook. Conveniently holds your purse within "YOUR" easy reach, not the person sitting at the table behind you!

**Compact, stylish, and elegant, purse hangers can be carried inside your handbag - ready to pull out and secure on a table or other suitable surface**
